Partner for Future Technology

- FEASA(TM) LED analyser
- Testing of several LEDs simultaneously for colour and brightness

Application

The FEASA(TM) LED Analyser is used to test several LEDs simultaneously for colour and brightness. The speed of the test depends on the intensity of the LEDs being tested, i.e. bright LEDs have a shorter test time, while weaker LEDs have a longer test time.

Interface

Connection via the serial RS232 interface requires an additional power supply, connection via the USB interface does not require an additional power supply.
